

LINE SHEET

System Design & Integration With a Specialty in Dry Bulk Solids

ABM Equipment is a one-stop-shop from initial product testing to scheduled maintenance 10 years after install. In-house engineering, fabrication, integration, & general contracting improve communication and reduce load on producers. This is a list of favored brands, but we will integrate what is best for your process.

Truncated list of partnered brands

			
Scales & Weighing Systems	Load Cells	Metal Detection, X-Ray, Vision Systems, Analysers	Screeners
			
Tubular Drag Conveyors	Dust Collection, Pneumatics	Analytics & Control Software	X-Ray
			
Stone Mills	Magnets	Mixers	Silos & Large Tanks
			
Smaller Packaging	Radiation Safety Training	Conveyors	Augers & Bulk Fillers

360-558-7156

* These brands are exclusive at least in the northwest, with Eagle exclusive in most of the Western States, and Mettler Nationwide.

ABM Services

Engineering

Process engineering, mechanical engineering for the system, and mechanical engineering for equipment, we handle everything in-house so it works well in yours.

X-Ray Rentals + Reclaim Services

We help people meet unexpected inspection needs, whether they'd like to inspect it at their plant or ours.

Fabrication

We fabricate custom equipment & structures needed for your system

Integration

New system or old, we'll integrate new equipment seamlessly into your line.

Scale Rentals, Repair, & Calibration

Our full-service shop can receive your scales or visit your facility and service them on-site.

ABM Products

Scale Packages

Our daughter company, A-1 Scales, builds custom flow scales that reduce costs and improve accuracy.

Auto-Pulse Bag Dumps

ABM's bag dumps draw air while the lid is open and reverse-pulses the filters when the lid is closed.

Bins & Hoppers

ABM builds BBUs for applications that need a sturdier solution.

Custom Equipment

Like the equipment from OEM 1 but want a feature from OEM 2? We can probably do that!

Online Training

Part of our streamlined rollout package, our easy portal allows you to manage and track students for x-ray operation and radiation training.

Roller Mills

ABM has recently introduced dust-tight roller mills to solve persistent problems in their categories.

Auto-Pulse Bag Dump Stations

ABM's bag dump station draws air while the lid is open and reverse-pulses the filter when the lid is closed.

Bulk Bag Unloaders

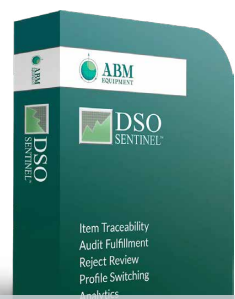

ABM builds BBUs for applications that need more sturdy solutions than those common on the market.

Mezzanines, Supports, and Transitions

We build all intermediary components needed to turn equipment into systems.

DSO Sentinel

Originally created to make x-ray data more powerful and usable, DSO Sentinel now controls whole processing systems.
